## Assessing progress: Introduction

Our mission at Brighton Hill Community School is to create and maintain a culture where success is inevitable. To succeed, our students must have a clear vision of the journey they are on and the progress they are making on that journey.

We pride ourselves on developing the whole child, not only their academic progress, but their pastoral development too. The BHCS 'cornerstones' of courage, commitment, collaboration \& kindness are key to this. This document is designed to provide you with an outline on how you can understand, monitor, and support your child's academic progress and 'making success inevitable'.

With this inevitable success in mind there are four cornerstones of expectation we hold with our students, parents, and staff:

- Commitment - We all develop a belief that everybody can improve and reach for excellence through effort and hard work. This is achieved when expectations and levels of challenge are consistently high.
- Courage - When we are learning new knowledge or skills, we understand the learning journey will rarely be easy, there will be a struggle where failure is initially expected and embraced. We learn from our mistakes and embrace challenges that will push our progress forward.
- Collaboration - We work together as a whole team and all benefit from good quality feedback, we strive to develop a culture where the BHCS feedback cycle is fully embedded.
- Kindness - We celebrate success \& diversity of all. We aim to inspire each other to model the successes of others. We believe this will nurture and develop the characteristics of those individuals in ourselves, thus, supporting consistent improvement in all.

If success is a destination, a clear road map is required to reach that destination effectively. The start of your child's journey to this destination must therefore begin with determining their current position.

Over the last few years, the landscape of academic qualifications has changed significantly in all subject areas. Not only in terms of how qualifications are graded but also in terms of the focus of knowledge and skills to be mastered. As a school it has been necessary to respond to this to provide you with a clear understanding of your child's current attainment, as well as their progress and projected progress over time to their destination.

Since the 2018/19 academic year, students joining BHCS have had their KS2 SAT outcomes (for the academic year 2020-2021 \& 2021-22 these were Primary School Teacher Assessed Grades due to the cancellation of all national assessments because of Covid-19) collated alongside their CAT 4 assessments. These results are subsequently aligned with National
data provided by FFT Aspire to determine each child's start point with us. We call this their 'baseline fine grade'. A unique grade is allocated for each subject area of study.

To add an extra level of context, our new Year 7 students complete subject specific benchmark assessments across the opening weeks of their first term. The results of these assessments afford Heads of Faculty (HoF) the opportunity to make any final adjustments to individual student's 'baseline fine grades' using their professional judgement. It is from this 'baseline fine grade' that student progress is measured, reported, and celebrated at each Teacher Assessment (TA) point in the 5 years they spend in our care.

Since the 2018/19 academic year, we have stopped operating two distinct assessment systems between KS3 \& KS4. In each subject we now provide a bespoke progress pathway that measures progress from the 'baseline fine grade' awarded in Year 7 unique to each subject and child.

The primary benefits of this system to you and your child are that it will afford the opportunity to not only celebrate the individual's progress within the year, but also give your child and you an even clearer vision on the potential GCSE outcomes by subject come the end of Year 11.

From a school perspective, the system will further strengthen our ability to track progress in line with potential GCSE outcomes and where necessary, apply targeted intervention in the form of 'therapies' to address the diagnosed areas for development that may be required to maintain your child's positive progress, from TA point to TA point, to achieve at least their minimum expected attainment pathway (EAP).

## Assessing progress: End of Year 11 Performance Bands, Grades and Fine-Grades

Qualifications are now graded $9-1$ in all GCSE subjects, with 9 being the highest level of achievement and 1 being the lowest awarded grade (An ungraded $U$ can be awarded to students who fall short of the number graded standard). A grade 4 is considered a pass (equivalent to a mid to low $C$ in the old format) with a grade 5 considered a strong pass (equivalent to a high C in the old format). With our culture of high expectations, we expect to see students make a minimum of 1 fine grade of progress per term in each subject they study (see table 2).

Now all GCSE subjects have adopted the 9-1 grading system we are able to apply this model by subject to all students on arrival in Year 7. As a result, this model of minimum expected progress will continue across KS3 uninterrupted into Key Stage 4. The result is a clear progress pathway from their 'baseline fine grade' at the start of Year 7 towards a final projected end of course minimum projected 9-1 grade within an allocated 'End of Year 11 projected performance band'.

As the BHCS curriculum offer continues to evolve to meet our context and the needs of your child, new subjects are introduced, some of which, such as Cambridge Technical Awards and V-Certs (vocational awards equivalent to GCSE's) do not use the 9-1 outcome measure, but
a grading system based on a distinction, merit \& pass basis. For these subjects progress will be reported using fine grades in the same way as 9-1 but you will see the equivalent distinction, merit \& pass descriptor alongside it.

We also have some subjects that are options from Year 9 only and not studied in Years 7 \& 8. These subjects will follow the same process of setting baseline fine grades. This will commence from the start of year 9 when baseline fine grades will be provided in the Yr9 Teacher Assessment (TA) 1 Progress Tracker. Academic progress will be measured against these baseline fine grades across the 3 years of study in these specific subject courses.

As progress outcomes are determined by minimum expected attainment grades being achieved, all students and parents should be aware that full attendance, maximum effort and consistent adherence to all school policies must be applied to secure their inevitable success. Historically, where this is achieved, opportunities exist for students to progress beyond their documented 'end of Year 11 projected performance band'. Or in the case of the 'excellence performance band' achievement of the highest grade, grade 9, can be expected.

| End of Year 11 projected <br> performance band | Year 7 baseline fine grade | Projected final GCSE grade <br> range |
| :--- | :--- | :--- |
| Excellence | 2 c and above | $7-9$ |
| Strong | $1 \mathrm{f}-1 \mathrm{a}$ | $5-6$ |
| Secure | $1 \mathrm{i}-1 \mathrm{~g}$ | 4 |
| Foundation | $1 \mathrm{j}-$ PRE | $1-3$ |

Table 1: End of Year 11 projected performance bands indicating projected final GCSE grade range, where minimum progress or higher is achieved and maintained across the years by the student.

In order to track progress, BHCS use a fine grading system where each whole grade is subdivided into 3 parts or 'fine grades', the fine grade model with descriptors is illustrated in Table 2 below.

| Grade | Fine <br> grade | Seen on progress tracker as <br> the 'current working at fine <br> grade' | Descriptor |
| :--- | :--- | :--- | :--- |
| 4 | a | 4a | Securely meeting the criteria for this <br> grade, close to achieving the grade above. |
| 4 | b | 4b | Meeting at least half the criteria for this <br> grade but not yet close to achieving the <br> grade above. |
| 4 | c | 4c | Meeting the minimum criteria for this <br> grade, at risk of dropping a grade lower <br> without sustained progress. |

Table 2: Example of the fine grading system as shown at grade 4 (considered a GCSE standard pass)

## Assessing progress: Year 7 baseline fine grade

The BHCS assessment system will provide a baseline fine grade determined at the start of year 7 this will be used to determine the progress your child has made by the time you receive their first 'Progress Tracker' in Term 2. Future progress in subsequent terms and years is determined by applying the fine grading scale explained previously and taking each subject's progress matrix into account (see appendices), in many subjects a bespoke baseline is then applied to reflect the progress journey in that specific subject.

From the start of Year 7, your child will be developing knowledge and skills that directly apply to the suite of qualifications we offer on the KS4 curriculum at BHCS. When your child comes to selecting their option subjects at the end of Year 8 you will have a clear view on which option subjects your child is progressing most positively in. This can help you and your child, along with guidance from the school, to select the best possible combination of subjects to pursue in KS4, Years 9-11 as part of the BHCS 'guided choices' process.

Naturally the Year 7 'baseline fine grade' will vary not only by individual student but for the individual student within each subject area. In Year 7 the fine grading system operates as described above to align with GCSE number grades; however, Year 7 is unique as there is an extended sub grading system at grade 1. Not all students will join BHCS with the knowledge and skills required to immediately achieve a GCSE grade 1 in any given subject. For this reason, the sub-grading for Grade 1 will extend beyond $1 \mathrm{a}-\mathrm{c}$ to also include letters d through to j. See figures $1 \& 2$ below for different examples of student progress from different fine grade baseline starting points.

1g Fine grade at final assessment point of Year 7

1j Fine grade baseline

Figure 1: An example of student's progress journey measured in fine grades where the student's 'baseline fine grade' is $1 j$ and the student makes the expected 1 fine grade of progress per term in their first year. In this scenario the student ends the year on a fine level of 1 g and has yet to achieve the lowest fine grade aligned to a GCSE qualification of 1 c .

Figure 2: An example of student's progress journey measured in fine grades where the student's 'baseline fine grade' is $1 e$ and the student makes the expected 1 fine grade of progress per term in their first year. In this scenario the student ends the year on a fine level of 1 b and is now considered to be able to access a Level 1 GCSE qualification in this subject area.

Table 3 illustrates how progress journeys for different children (Student A, Student B, Student C \& Student D) with different 'baseline fine grades' in English might look if the minimum expected progress of one fine grade per term is made across the 3 terms in Year 7. The scenarios are further extended to demonstrate the final GCSE outcome if the student maintains the termly minimum expected progress across all 5 years. Note the illustrative example is for English. See Appendices for the full minimum expected progress matrix by subject, baseline grade and termly assessment point. As previously stated, each subject's demands in skill and knowledge vary across the years resulting in different subjects having different rates of expected progress. These rates of progress are reflected in the progress matrix of each subject.

| Student | Baseline fine <br> grade | Term 1 <br> fine grade <br> progress | Term 2 <br> fine grade <br> progress | Term 3 <br> fine grade <br> progress | 'working <br> at' fine <br> grade at <br> end of <br> year 7 | Minimum <br> fine grade <br> outcome of <br> GCSE at end <br> of course in <br> Year 11 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| A | 1 j | +1 | $+1(+2$ total) $)$ | $+1(+3$ total) | 1 g | 3 a |
| B | 1 e | +1 | $+1(+2$ total) | $+1(+3$ total) | 1 b | 5 b |
| C | 2 a | +1 | $+1(+2$ total) | $+1(+3$ total) | 3 a | 7 a |
| D | 4 b | +1 | $+1_{(+2 \text { total) })}$ | $+1(+3$ total) | 5 b | 9 b |

Table 3: Examples of 4 Year 7 children with different 'baseline fine grades' in English making expected minimum progress across their first year, including final outcome if minimum expected progress is maintained across all 5 years.

BHCS delivers 'quality first teaching' (QFT) across all subjects, designed to support your child in making a minimum of one sub level of progress a term. You will be able to clearly track and understand your child's learning journey with us from the 'progress tracker' you will receive.

It is understood there may be students with skills and knowledge gaps and/or specific educational needs that join BHCS without being able to demonstrate the skills or knowledge to achieve the minimum initial baseline of 1 j . In these cases, the BHCS 'SEND' team and/or teaching staff (depending on the level of need) will work closely with the child and parents/carers to report and track progress in supporting the child in reaching the standards of knowledge and skill required to reach 1 j , from which point the progress model previously described will apply.

## Tracking progress: In-year fine grade progress to date

Your child's Year 7 Baseline fine grade can be requested if required from the relevant teacher. The first Progress Tracker however will show you the 'in-year fine grade progress to date' number. This will inform you of how many levels of fine grade progress your child has made since the start of the year compared to their 'baseline fine grade'. For students in years 8-11 the in-year fine grade progress to date is measured against the assessment end point of the previous academic year (TA2), relative to each subject's progress matrix (see appendices).

| Subject | End of year <br> 11 projected <br> performance <br> band | In-year <br> fine <br> grade <br> progress <br> to date | Current <br> working <br> at fine <br> grade | Subject <br> progress <br> since <br> joining <br> BHCS | Term 1 <br> Attitude to <br> Learning |
| :--- | :--- | :--- | :--- | :--- | :--- |
| English <br> Literature | Strong | +1 | 1 f | Making <br> good <br> progress | Good |
| English <br> Language | Strong | 0 | 1 g | Making <br> expected <br> progress | Good |
| Maths | Excellence | -1 | 1 h | Making <br> expected <br> progress | Excellent |

Table 4: Demonstrates that 'in-year fine grade progress to date' can be reported as a positive progress number (+) where a student has made progress against their original position (year 7 baseline or bespoke baseline depending on subject), a 0 denoting no progress has been made compared to their original position compared to their Year 7 baseline, or a negative progress number (-) where student has made negative progress against their original position compared to their Year 7 baseline. The same is true for years 8 - 11 where progress is measured against the last assessment point (TA2) of the previous academic year

## Assessing progress: Subject progress since joining BHCS

Reporting progress to parents/carers will be on a biannual basis via the 'progress tracker' and supporting parents' evenings. It will present a view on how students are performing in each subject relative to their 'end of Year 11 projected performance band', and 'current working at fine grade' as described in Tables 1, 2 \& 3 . It will also include 'subject progress since joining BHCS' as detailed in Table 5 below which will appear alongside the 'current working at fine grade' for that subject as described in Table 2.

| Subject progress since <br> joining BHCS | Definition |
| :--- | :--- |
| Making less than expected <br> progress | The student has regressed <br> compared to their minimum <br> expected progress and is no longer <br> currently on target to achieve their <br> 'performance band'. |
| Making expected progress | The student remains on track to <br> achieve their expected <br> 'performance band'. |
| Making good progress | The student has made more than <br> expected progress and is set to <br> achieve the next 'performance <br> band' up from their originally <br> projected 'performance band'. |
| Making exceptional <br> progress | The student is progressing at such a <br> rate that they are now projected to <br> achieve a GCSE grade 2 or more <br> 'performance bands' higher than <br> their originally projected <br> 'performance band'. |

Table 5: Subject progress since joining BHCS descriptors are allocated relative to the student's progress compared to their assigned 'End of year 11 projected performance band'.

## Assessing progress: Attitude to learning

The Progress Tracker will also provide a measure for attitude to learning (ATL).

| Attitude to <br> learning score | $\quad$ Definition of score |
| :--- | :--- |
| 1 Excellent | The student is consistently engaged in their learning, always giving <br> maximum effort and responding effectively to teacher feedback. <br> Students show a real 'thirst for learning'. Behaviour is excellent at all <br> times. |
| 2 Good | The student usually is engaged in their learning, often giving their <br> maximum effort and responding effectively to teacher feedback. <br> Behaviour is good at all times. |
| 3 Inconsistent | The student can be off task but responds to redirection. The student <br> does not always respond to feedback and requires reminders to <br> demonstrate progress. Behaviour can be inconsistent at times. |
| 4 Poor | The student sometimes responds to redirection but sometimes <br> escalation of sanctions is required. The student rarely responds to <br> feedback independently and very little effort is made to engage in <br> learning. An attitude to learning score of 4 or below will result in direct <br> contact home. Behaviour is often poor. |
| 5 Poor and <br> disruptive | The student rarely responds to redirection and often escalation of <br> sanctions is required. The student never responds to feedback and is <br> unable to demonstrate an ability to work independently with no effort <br> made to engage in their learning. Behaviour is often poor and disruptive. |
| 6 Extremely <br> disruptive | The student never responds to redirection and as a result additional <br> support is required, this will often be alternative learning provision. <br> There is no evidence of student response to feedback and no evidence <br> of engagement in learning. Behaviour is consistently poor and highly <br> disruptive. |

Table 6 Attitude to learning (ATL) points scale with descriptors.

## Assessing progress: The Progress Tracker

Below is a hypothetical example of how the 'progress tracker' will look for your child, including all the elements described above with a view to illustrating possible permutations. As in the example below, each piece of data reported is aligned to the different key questions our parents have told us they are interested in. Not all parents want the same information, so this format of key questions by column allows you to focus on just the key attainment and progress information that is of interest to you.

|  | What level <br> of GCSE <br> should my <br> child <br> achieve? | Is my <br> child <br> making <br> progress <br> this <br> academic <br> year? | What <br> grade is <br> my child <br> currently <br> achieving? | Is my child <br> still on track <br> to achieve <br> their end of <br> year 11 <br> projected <br> performance <br> band? | ls my child <br> still <br> displaying <br> the right <br> attitude to <br> learning? |
| :--- | :--- | :--- | :--- | :--- | :--- |
| End of Year <br> 11 projected <br> performance <br> band | In-year <br> fine <br> grade <br> progress <br> to date | Current <br> working <br> at fine <br> grade | Subject <br> progress <br> since joining <br> BHCS | Term 1 <br> Attitude to <br> Learning |  |
| English <br> Literature | Strong | +2 | 2b | Making good <br> progress | Good |
| English <br> Language | Strong | +3 | 3b | Making <br> exceptional <br> progress | Good |
| Maths | Excellence | +1 | 3b | Making <br> expected <br> progress | Excellent |
| Science | Strong | 0 | 2b | Making <br> expected <br> progress | Good |
| History | Strong | 0 | 1c | Making less <br> than <br> expected <br> progress | Inconsistent |

Table 7: Example of an extract from a Year 8 Term 1 Progress Tracker providing examples of each element.

In the hypothetical example above the following is true:
In English Literature, the student has achieved 2 fine grades of progress compared to their Year 7 Term 3 assessment point. In this case, for this student, they are 'making good progress'. This means if they continue to make at least the minimum level of progress in subsequent assessment periods, they are now in a position where they are projected to
achieve a higher performance band (Excellence rather than Strong) in this GCSE subject come the end of the course.

In English Language, the student has achieved 3 fine grades of progress in this assessment period. At this point they are making 'exceptional progress'. This is because if they continue to make at least the minimum level of progress in each of the subsequent assessment periods they are now in a position where they are projected to achieve a performance band 2 bands higher (Excellence rather than Secure) in this GCSE subject.

In Maths, the student has achieved 1 fine grade of progress (the minimum expected level of progress) in this assessment period, as a result they are recorded as 'making expected progress' and remain on course to make their projected performance band ('excellence') if they continue to make at least the minimum level of progress in subsequent assessment periods.

In Science, the student has made no fine grade progress. The student is still categorised as 'making expected progress' because as it stands (if the student can recover and continue to make at least the minimum expected level of progress in subsequent assessment periods), they will still achieve their projected GCSE grade in their allocated performance band ('strong'). This student will however be flagged to teaching staff and therapies may well be applied beyond quality first teaching to support student progress.

In History the student has made no fine grade progress. However, in this instance even if the student goes on to make the minimum level of fine grade progress each term they will not achieve their projected performance band (achieving secure rather than strong). They have now fallen to a lower performance band and are therefore identified as making 'less than expected progress'. This student will be flagged to teaching staff and therapies will be applied beyond quality first teaching to support student progress.

## Assessing Progress: Issuance of Progress Trackers

|  | Year 7 | Year 8 | Year 9 | Year 10 | Year 11 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Progress <br> Tracker 1 | $19^{\text {th }}$ <br> February | $30^{\text {th }}$ <br> October | $27^{\text {th }}$ <br> November | $22^{\text {nd }}$ <br> January | $13^{\text {th }}$ <br> November |
| Progress Matrix <br> Comparison <br> Point | Term 1 | Term 1 | Term 1 | Term 1 | Term 1 |
| Progress <br> Tracker 2 | st <br> July | 22 <br> April | $13^{\text {th }}$ <br> May | 24th <br> June | $11^{\text {th }}$ <br> March |
| Progress Matrix <br> Comparison <br> Point | Term 3 | Term 2 | Term 2 | Term 3 | Term 2 |

Table 8: 2023/24 Window release dates of progress trackers by term and year group.

NB: Progress is rarely linear for any student. The progress tracker acts as a guide for parents and students. Depending on where the progress issuance falls, compared to the termly matrix, may see students slightly behind or slightly ahead of their EAP. For example, Progress Tracker 1 for Years 8, 9\&10 are issued before the end of Term 1 (but progress is
measured against the end of Term 1 matrix for the respective year) so some students may yet close the gap with the remaining teaching weeks remaining if they are behind their projected EAP, this gap however should be no greater than -1 fine grade. Further behind than this would suggest a student needs additional therapies. The BHCS progress review system would assure the relevant support is put in place for children in this position.

## Glossary of terms

Fine grade: Grades are awarded from levels $1-9$. In school the grades are subdivided into fine grades to afford closer monitoring of progress. The culture of high expectations at BHCS requires students to achieve an average of one fine grade per term of progress. With three terms a year, the fine grade is structured as a, b, c. (refer to table 2 for more detail).

Progress tracker: Document issued twice a year (with Year 7 having an additional Baseline Tracker at the start of their first academic year at BHCS) providing an overview of student progress by subject, including 'performance band', 'baseline fine grade', 'fine grade progress', 'working at fine grade', 'progress descriptor' and 'attitude to learning' score.

End of Year 11 projected performance band: The projected GCSE band in which the student should end the subject course if they maintain the minimum expected sub grade progress per term. This answers the common parent question: "What level of GCSE should my child achieve?"

Minimum expected fine grade progress: Students are expected to make a minimum of 1 fine grade of progress per term in each subject they study.

Baseline fine grade: All students will receive a baseline fine grade at the start of year 7 this will be calculated using KS2 SAT results, BHCS benchmark exams and data provided by FFT Aspire.

In-year fine grade progress to date: The term used to identify the total number of fine grades of progress achieved compared to the end point assessment (TA2) of the previous year. For Year 7 this is compared to their baseline fine grade issued at the start of Year 7 (TA1). This answers the common parent question: "Is my child making progress this academic year?"

Fine grade: Whole grades are sub-divided into 3 fine grades where grades are GCSE numbers and sub-divisions are the letters $a-c$ where $a$, is the top sub grade, $b$ is the middle grade and c is the bottom grade of the subdivisions.

Assessment period: Students are assessed with formative and summative assessments across each term. These assessments are used (alongside other indicators such as home learning performance, Attitude to Learning, attendance \& professional judgement) to determine a 'current working at fine grade' which allows the calculation of a fine grade for progress documented in each 'Progress Tracker'.

Current working at fine grade: This is the fine grade the student is currently achieving for the course as a whole. It is the accumulative grade from fine grade progress achieved across terms reflecting knowledge and skills secured. This answers the common parent question: "What grade is my child currently achieving?"

Subject progress since joining: This defines whether the student is currently below, on above or significantly above their minimum projected performance band. This answers the common parent question: "Is my child still on track to achieve their end of year 11 projected performance band?"

Attitude to learning score: A measure of a student's behaviour, engagement and commitment to progress in the classroom. This answers the common parent question: "Is my child still displaying the right attitude to learning?"

Appendices
Appendix I - Linear Progress Matrix for English
NB: In exceptional circumstances students may be awarded a higher baseline fine grade than 4A. If achieving the minimum expected progress per term they can reach the maximum grade of 9A sooner than Year 11 Term 3. In some cases this may lead to consideration of early exam entry.

| Baseline | Year 7 <br> Term 1 | Year 7 <br> Term 2 | Year 7 <br> Term 3 | Year 8 <br> Term 1 | Year 8 <br> Term 2 | Year 8 <br> Term 3 | Year 9 <br> Term 1 | Year 9 <br> Term 2 | Year 9 <br> Term 3 | Year 10 Term 1 | Year 10 Term 2 | Year 10 <br> Term 3 | Year 11 <br> Term 1 | Year 11 Term 2 | Year 11 <br> Term 3 | KS4 Exams | Performance Band |

Appendix II - Bespoke Progress Matrix for Maths
NB: In exceptional circumstances students may be awarded a higher baseline fine grade than 4A (2B). If achieving the minimum expected progress per term they can reach the maximum grade of 9A sooner than Year 11 Term 3. In some cases this may lead to consideration of early exam entry.

Appendix V - Bespoke Progress Matrix for Spanish
NB: If Spanish is selected in Year 9 with no KS3 exposure the following progress matrix applies. In exceptional circumstances students may be awarded a higher baseline fine grade than $4 \mathrm{~A}(1 \mathrm{~J})$ resulting in accelerated progress compared to that shown on the matrix and potentially achieving a grade 9 by Year 11 exams.

| Linear Baseline | Bespoke Baseline | Year 9 <br> Term 1 | Year 9 <br> Term 2 | Year 9 <br> Term 3 | Year 10 <br> Term 1 | Year 10 <br> Term 2 | Year 10 <br> Term 3 | Year 11 <br> Term 1 | Year 11 <br> Term 2 | Year 11 <br> Term 3 | Exams | Performance Band |

Appendix VI - Bespoke Progress Matrix for Religious Studies
NB: In exceptional circumstances students may be awarded a higher baseline fine grade than 4A (2C). If achieving the minimum expected progress per term they can reach the maximum grade of 9A sooner than Year 11 Term 3. In some cases this may lead to consideration of early exam entry.

Appendix XIII- Bespoke Progress Matrix for Art
NB: In exceptional circumstances students may be awarded a higher baseline fine grade than 4 A (1E). If achieving the minimum expected progress per term they can reach the maximum grade of 9A sooner than Year 11 Term 3. In some cases, this may lead to consideration of early exam entry.

| Linear baseline | Bespoke baseline | Year 7 <br> Term 1 | Year 7 <br> Term 2 | Year 7 <br> Term 3 | Year 8 <br> Term 1 | Year 8 <br> Term 2 | Year 8 <br> Term 3 | $\begin{aligned} & \hline \text { Year } 9 \\ & \text { Term } 1 \end{aligned}$ | $\begin{gathered} \hline \text { Year } 9 \\ \text { Term } 2 \end{gathered}$ | Year 9 <br> Term 3 | Year 10 <br> Term 1 | Year 10 <br> Term 2 | Year 10 <br> Term 3 | Year 11 <br> Term 1 | Year 11 <br> Term 2 | Year 11 <br> Term 3 | Exams | Performance band |
